TARIFF CLASSIFICATION OF GOODS
(Review of the reference book of J. J. Gurevičienė)

This Manual is intended for students studying the tariff classification of goods.

The publication deals with the International Convention on the Harmonised Commodity Description and Coding System, introduces the Harmonised Commodity Description and Coding Nomenclature, Combined Nomenclature of the European Communities, European Community Common Customs Tariff, the EC integrated tariff system TARIC and national system LITAR. The principles of goods' classification, general interpretation rules are also described briefly therein. The index of some goods classified in the Combined Nomenclature is provided at the end of the book.

The Manual will also be very useful to customs officers, officials of tax inspectorates, agents and businessmen, i.e. to everybody who cooperate with the customs authorities, who is involved in foreign trade, or provides services to public and who is interested in the above mentioned issues.
